The OGCC has statutory responsibility to regulate the drilling for and production of oil, gas, helium

It consists of five members appointed by the Governor and one ex-officio member, the State Land Comr

Featured Publication: The Arizona Geology published in winter 2003

The current posted price of \$62.25 per Mcf has increased interest in the hunt for helium. Some of the richest helium-bearing gas in the world is produced in Arizona. Helium concentrations
